

An abstract botanical illustration featuring wavy, layered lines in shades of green, teal, and orange. Various leaves in different colors (green, orange, and brown) are scattered throughout the composition. A large, solid green circle is positioned behind the text. Several smaller circles, some solid and some outlined, are also present.

ON LAND

Our vision

1. **Zero Hunger:**

Combat world hunger by empowering people to grow their own food sustainably, adapt to changing climates, and optimize resources—making self-sufficiency accessible to everyone, everywhere.

2. **Sustainable Cities and Communities:**

Empower seed databases to support urban gardening initiatives, fostering community resilience, engagement, and sustainable living practices.

3. **Life on Land:**

Enable seed databases to actively promote biodiversity conservation, encouraging users to adopt and cultivate native and resilient plant species.

4. **Climate Action:**

Leverage seed databases to educate communities about climate-sensitive gardening, ensuring plants thrive, environmental impact is minimized, and resilience against climate change is strengthened.
